

CLAIMS

1. An interlayer film for a laminated glass,
5 which contains a polyvinyl acetal resin and a moisture resistance improver.
2. The interlayer film for a laminated glass according to Claim 1,
10 wherein the moisture resistance improver is an amphiphile and/or a surfactant.
3. The interlayer film for a laminated glass according to Claim 1 or 2,
15 wherein the moisture resistance improver has a solubility parameter in the range of 10.0 to 20.0 $(\text{cal}/\text{cm}^3)^{1/2}$.
4. The interlayer film for a laminated glass according to Claim 1, 2 or 3,
20 wherein the moisture resistance improver has a relative permittivity in the range of 20 to 35 at 25°C.
5. The interlayer film for a laminated glass according to Claim 1, 2, 3 or 4,
25 wherein the moisture resistance improver is a phosphate ester compound.
6. The interlayer film for a laminated glass according to Claim 1, 2, 3, 4 or 5,
30 which contains a chelating agent and/or a compound having at least one carboxyl group.
7. The interlayer film for a laminated glass according to Claim 6,
35

wherein the chelating agent is acetylacetone.

8. The interlayer film for a laminated glass according to Claim 6,

5 wherein the compound having at least one carboxyl group is 2-ethyl hexanoic acid.

9. The interlayer film for a laminated glass according to Claim 1, 2, 3, 4, 5, 6, 7 or 8,

10 which contains a heat ray shielding particle.

10. The interlayer film for a laminated glass according to Claim 9,

15 wherein the heat ray shielding particle is at least one kind selected from the group consisting of a tin-doped indium oxide (ITO) fine particle, an antimony-doped tin oxide (ATO) fine particle, an aluminum-doped zinc oxide (AZO) fine particle, an indium-doped zinc oxide (IZO) fine particle, a silicon-doped zinc oxide fine particle, a zinc
20 antimonite anhydride fine particle, and a lanthanum hexaboride fine particle.

11. An interlayer film for a laminated glass,

25 which contains at least one kind of inorganic fine particle selected from the group consisting of a silica fine particle, an aluminum oxide fine particle, and a zirconium oxide fine particle, the inorganic fine particle having a dispersion diameter of 500 nm or less.

30 12. A laminated glass,

which is obtainable by using the interlayer film for a laminated glass according to Claim 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 or 11.
